

NITEENKUMAR PARDESHI

Data Analyst | Statistical Analyst | Reporting & BI Specialist

+91-7020517701 | niteenkumarpardeshi@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

M.Sc. Statistics candidate driven by continuous learning and an innovation mindset, with hands-on experience in data engineering, statistical analysis, and end-to-end machine learning (supervised and unsupervised). Proven ability to formulate hypotheses, extract insights from complex structured data, and design intuitive dashboards (Tableau, PowerBI) to maximize user experience. Adept at rationally transforming raw data into actionable business intelligence. Collaborative team player with strong technical communication skills to explain data models and analytical solutions to cross-functional stakeholders.

EXPERIENCE

Statistical Analyst / On-Job Trainee | Bharti Hospital & Research Centre, Pune May – Jun 2025

- Collected, cleaned, coded, and managed clinical datasets from multiple medical sources, ensuring data accuracy, consistency, and readiness for statistical analysis.
- Performed descriptive and inferential statistical analyses using **SPSS, R, Excel**, including hypothesis testing (*t-tests, Chi-square tests, ANOVA, Wilcoxon, and Kruskal-Wallis tests*) to support evidence-based clinical research.
- Studied **sample size estimation for research studies** using GitHub-based sample size calculators by considering study design, confidence level, statistical power, effect size, and precision requirements.
- Assisted in study design and clinical research planning for observational and interventional studies while supporting protocol preparation and statistical methodology selection.
- Applied survival analysis techniques including **Kaplan–Meier curves, Log-rank tests, ROC analysis, and Cox proportional hazard models** for clinical outcome assessment.
- Prepared statistical summaries, tables to support research documentation and publication activities.

Virtual Learning Centre Mentor | Shikshanganga (Non-Profit), Jalgaon Dec 2024 – Nov 2025

- Mentored 10+ students, leveraging analytics to monitor academic progress and drive critical thinking.

PROJECTS

Investment Behavior Survey — Ph.D. Research Project Aug – Oct 2025

Collaborators: Pratiksha Jain (Ph.D.), Dr. Manoj Patil (Asst. Prof.), Jalgaon

- Collected and cleaned survey data; performed hypothesis testing, chi-squared, correspondence analysis (Bi-plots), and ANOVA.
- Delivered regular, reliable, and actionable reports to faculty and stakeholders using reporting documents R-Quarto, R-Markdown.

Predictive Modeling & Feature Selection via Regularized Regression (R) [\[GitHub\]](#) Jul – Dec 2025

Collaborators: N. Pardeshi, Dr. R.D. Koshti (Asst. Prof.), Jalgaon

- Benchmarked Ridge/Lasso regression against Recursive Feature Elimination (RFE) for RMSE improvement and feature reduction.
- Built cross-validation frameworks using R (caret, glmnet) to improve model reproducibility and interpretability.
- Documented model comparison methodology and KPI definitions; communicated results to academic supervisors.

Benchmarking Target-Based Categorical Encoding for Tabular Data [\[GitHub\]](#) Jan – May 2026

Collaborators: N. Pardeshi, Dr. R.D. Koshti (Asst. Prof.), Jalgaon

- Engineered an automated, reproducible machine learning pipeline in Python (scikit-learn) to evaluate advanced categorical encoders across six diverse OpenML datasets.
- Benchmarked Weight of Evidence (WOE) and CatBoost against classical methods, optimizing models (Random Forest, SVM, Logistic Regression) for high-cardinality data while successfully mitigating target leakage.
- Validated global encoder performance metrics (AUC, F1-Score) using non-parametric statistical frameworks, including Friedman and Nemenyi post-hoc tests.

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, scikit-learn, Matplotlib, Ststsmodels, Streamlit, Seaborn, TensorFlow, Py-Torch), R (dplyr, ggplot2, caret, glmnet, tidyverse, plotly, Quarto), SQL
BI & Viz	Tableau, PowerBI, R Shiny, Jupyter, Excel (Advanced), SPSS, Minitab
Statistical/ML	Design of Experiments (DoE), Hypothesis Testing, Predictive Modeling, Advanced Regression (Ridge/Lasso/ElasticNet), Feature Selection (RFE), Supervised Learning (Random Forest, SVM, Naive Bayes, CatBoost, GBM), Classification (LDA/QDA), Dimensionality Reduction (PCA, CCA), Cross-Validation, Data Mining, Outlier Analysis
Reporting	R Markdown, Quarto, GitHub
Data Quality	Data Cleaning, Inconsistency Detection, Duplicate Removal, Multi-source Structuring
Soft Skills	Attention to Detail, Results-Driven, Team Collaboration, Ability to Synthesize & Simplify, Meets Tight Deadlines

CERTIFICATIONS

- Data Analytics – Deloitte Data Analytics Job Simulation (2025) [\[GitHub\]](#)
- NPTEL – Data Structures and Programming in Python (2025) [\[GitHub\]](#)
- NPTEL – Applied Stochastic Procesess (2026) [\[GitHub\]](#)
- VLC Mentor – Shikshanganga Certificate of Internship Completion (2024–2025)
