

NITEENKUMAR PARDESHI

Data Analyst | Statistical Analyst | Reporting & BI Specialist

+91-7020517701 | niteenkumarpardeshi@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

M.Sc. Statistics candidate and data analyst with expertise in extracting, cleaning, and analyzing complex datasets to drive actionable business decisions. Proficient in Python (Pandas, NumPy), SQL, and advanced Excel, with strong hands-on experience building interactive dashboards in Power BI. Adept at conducting Exploratory Data Analysis (EDA) and applying advanced statistical modeling to identify trends, forecast outcomes, and translate data into clear, strategic insights for cross-functional stakeholders.

EXPERIENCE

Statistical Analyst / On-Job Trainee | Bharti Hospital & Research Centre, Pune May – Jun 2025

- Collected, cleaned, coded, and managed clinical datasets from multiple medical sources, ensuring data accuracy, consistency, and readiness for statistical analysis.
- Performed descriptive and inferential statistical analyses using **SPSS, R, Excel**, including hypothesis testing (*t-tests, Chi-square tests, ANOVA, Wilcoxon, and Kruskal-Wallis tests*) to support evidence-based clinical research.
- Studied **sample size estimation for research studies** using GitHub-based sample size calculators by considering study design, confidence level, statistical power, effect size, and precision requirements.
- Assisted in study design and clinical research planning for observational and interventional studies while supporting protocol preparation and statistical methodology selection.
- Applied survival analysis techniques including **Kaplan–Meier curves, Log-rank tests, ROC analysis, and Cox proportional hazard models** for clinical outcome assessment.
- Prepared statistical summaries, tables to support research documentation and publication activities.

Virtual Learning Centre Mentor | Shikshanganga (Non-Profit), Jalgaon Dec 2024 – Nov 2025

- Mentored 10+ students, leveraging analytics to monitor academic progress and drive critical thinking.

PROJECTS

Investment Behavior Survey — Ph.D. Research Project Aug – Oct 2025

Collaborators: Pratiksha Jain (Ph.D.), Dr. Manoj Patil (Asst. Prof.), Jalgaon

- Collected and cleaned survey data; performed hypothesis testing, chi-squared, correspondence analysis (Bi-plots), and ANOVA.
- Delivered regular, reliable, and actionable reports to faculty and stakeholders using Quarto.

Predictive Modeling & Feature Selection via Regularized Regression (R) [\[GitHub\]](#) Jul – Dec 2025

Collaborators: N. Pardeshi, Dr. R.D. Koshti (Asst. Prof.), Jalgaon

- Benchmarked Ridge/Lasso regression against Recursive Feature Elimination (RFE) for RMSE improvement and feature reduction.
- Built cross-validation frameworks using R (caret, glmnet) to improve model reproducibility and interpretability.
- Documented model comparison methodology and KPI definitions; communicated results to academic supervisors.

Benchmarking Target-Based Categorical Encoding for Tabular Data [\[GitHub\]](#) Jan – May 2026

Collaborators: N. Pardeshi, Dr. R.D. Koshti (Asst. Prof.), Jalgaon

- Engineered an automated, reproducible machine learning pipeline in Python (scikit-learn) to evaluate advanced categorical encoders across six diverse OpenML datasets.
- Benchmarked Weight of Evidence (WOE) and CatBoost against classical methods, optimizing models (Random Forest, SVM, Logistic Regression) for high-cardinality data while successfully mitigating target leakage.
- Validated global encoder performance metrics (AUC, F1-Score) using non-parametric statistical frameworks, including Friedman and Nemenyi post-hoc tests.

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, scikit-learn, Matplotlib), R (dplyr, ggplot2, caret, glmnet, tidyverse, plotly, Quarto), SQL
BI & Viz	Power BI (Dashboards & Visual Reports), Tableau, Excel (Advanced: VLOOKUP, HLOOKUP, Pivot Tables), R Shiny, Jupyter
Statistical/ML	Exploratory Data Analysis (EDA), Predictive Modeling, Advanced Regression (Ridge/Lasso/ElasticNet), Time-Series Forecasting, Trend Analysis Hypothesis Testing, Feature Selection (RFE), Cross-Validation
Reporting	Quarto, GitHub
Data Engineering	Data Extraction (Multi-source systems), Data Cleaning, Integrity Validation, Inconsistency Detection, Structuring Databases
Soft Skills	Attention to Detail, Results-Driven, Team Collaboration, Ability to Synthesize & Simplify, Meets Tight Deadlines

CERTIFICATIONS

- Data Analytics – Deloitte Data Analytics Job Simulation (2025) [\[GitHub\]](#)
- NPTEL – Data Structures and Programming in Python (2025) [\[GitHub\]](#)
- NPTEL – Applied Stochastic Processes (2026) [\[GitHub\]](#)
- VLC Mentor – Shikshanganga Certificate of Internship Completion (2024–2025)
